Capacity Building to Strengthen Sustainable Implementation of Renewable Energy Technologies for Rural Energy Access Stakeholder Workshop

**Global
Green Growth
Institute**

KOICA
Korea International
Cooperation Agency

Electricity costs in the Solomon Islands are among the highest in the world, placing huge strains on all facets of life in Solomon Islands; health, education, business and livelihoods. A major transition towards a green energy future with renewable energy has been witnessed in the past decade, as a mitigating factor to combat the effects of climate change and transit towards a more greener and more sustainable energy solutions.

As a fortified means of informed and inclusive decision-making by resource owners and local government officials for integration of green economy (GE) and renewable energy (RE) into local level planning and to strengthen implementation of renewable energy (RE) infrastructure for rural electrification, the Global Green Growth Institute (GGGI) and the Pacific Islands Development Forum (PIDF) partnership, with funding from the Korea International Cooperation Agency (KOICA), has led to the development of a project titled Capacity Building to Strengthen Sustainable Implementation of Renewable Energy Technologies for Rural Energy Access Project.

For the purpose of project familiarization and assimilation to key national stakeholders, a national workshop is proposed to be conducted in Solomon Islands by PIDF in partnership with the Solomon Island Ministry of Mines Energy and Rural Electrification

Date: 29th October 2019 ~ **Time:** 8.30am - 4.30pm

Venue: Kairos Conference Center Suite 213, Hyundai Mall, Mendana Avenue
