## MAINTAINING A 1.5°C COURSE TO DECARBONIZE PACIFIC SHIPPING

On 8-10 November, Pacific transport leaders meet in Suva to talanoa the immediate need to set clear decarbonisation routes for this sector at the international, regional and national level. This webinar by leading experts presents the science from a range of perspectives to support this critical Pacific debate.

### Moderators

Albon Ishoda (Charge de Affaire, Suva Embassy, RMI) and Taholo Kami (Special advisor COP23 Secretariat)

Panelists will debate pre-recorded presentations followed by moderated discussion with an invited audience

### Panelists

Tristan Smith, University College London

Jimmy Nuake, Solomon Islands Government

Frida Youssef, UNCTAD

Michael Vahs, Hochschule Emden/Leer

Faranisese Kinivuwai, Fiji Government

Simon Bennett, China Navigation Company

Peter French, World Food Programme

- from Global to the Village – what does the IMO roadmap mean for the Paris Agreement and what are the impacts on the Pacific?
- from Village to Global – why is the Pacific in the IMO roadmap process and what are the red lines for SIDS?
- Transport, Trade, SDGs – what does decarbonizing shipping mean for SIDS and sustainable development?
- what are the technologies available today and what's on the horizon for Pacific scale shipping?
- what are the challenges for government in decarbonisation planning?
- Decarbonisation and Pacific shipping – a progressive industry perspective.
- Decarbonizing shipping – an opportunity or a challenge for disaster response?

Date: Thursday November 1st 2018

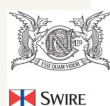

Venue: USP ICT conference room

Time: 9.00am-11.30am
